The Abacus Crack With License Key Free

Abacus counts the lines in your documents, records the line counts in a log file, and creates an invoice for you. You can create invoices for your clients or reconcile them with your employer. The program can be set to be activated by a keystroke or on its own. You can set it to execute when you start and stop it when you close Word. You can set it to launch automatically after you start or stop Word. Abacus creates a.txt file with the line count, the date and time, and the title for your invoices. This is a great program for transcriptionists who like to make good money and don't want to spend hours coding to keep track of your work. The key features of Abacus are: Counts the lines in your documents Creates an invoice based on the line counts in the log file Creates an invoice for your clients (or reconciles the invoice with your employer) You can see the line counts in your documents and the amount that you owe before you create the invoice. See the line counts for the current document in a table format. A separate log file for each document is created for easy tracking of the line counts. Options for the Line Counts: All/None - You can use this option to set the Abacus to count lines or not. Date/Time - The Abacus records the date and time that the line count was taken. This lets you create an invoice for the same time that you took your last line count. Number of Words - You can use this option to count the total number of words in your document (or a part of your document). Quarter/Whole - The Abacus records the lines that were counted in each of the 4 quarters of the year. Compare the Current Line Count with Previous Line Count You can view the line count for the current document in a table format. You can choose between a simple line count and a full-screen line count. The current document is counted in the table format, or you can start counting the lines in a specific portion of the document in the "Count From" box. In the "Select Next Count" box, you can choose between counting the first 4 lines, the first 5 lines, the first 10 lines, or the first 20 lines in the document. This is a great tool
